UJIAN TENGAH SEMESTER (UTS)

PEMROGRAMAN WEB III (PHP & MySQL) - PROYEK KURSUSKU

Semester	5	**SKS**	3 (Praktik)
Tahun Akademik	2026/2027	**Waktu**	150 menit
Nama	Suci Aulia	**NIM**	2524178

Petunjuk Pengerjaan

Ujian berbasis project dan bukti

- Jawaban wajib berasal dari project praktikum mahasiswa sendiri, bukan sekadar hafalan atau jawaban umum.
- Setiap nomor harus memiliki bukti screenshot yang relevan. Screenshot boleh berasal dari browser, View Source, DevTools, VS Code, atau hasil test project.
- Screenshot harus memperlihatkan konteks: nama file/tab atau URL dan area output/kode yang menjadi bukti. **Crop yang terlalu sempit tanpa konteks tidak dinilai sebagai bukti kuat terindikasi dari hasil teman kelas.**
- Buat folder evidence/uts/ untuk menyimpan file soal beserta jawabannya dalam bentuk pdf.
- Satu screenshot boleh dipakai untuk maksimal dua nomor jika benar-benar membuktikan kedua jawaban; tetap tulis nama file bukti pada masing-masing jawaban.
- Jika mahasiswa memodifikasi konten yang memang diizinkan panduan, jawaban dapat berbeda dari contoh dosen selama logika, hasil hitung, dan screenshot project konsisten.
- Pilih jawaban dengan highlight kuning.

A. Pilihan Ganda (Nomor 1-30)

Pilih satu jawaban yang paling tepat. Setelah jawaban huruf, tulis nama file bukti screenshot yang Anda lampirkan.

1. Ketika halaman server-time.php di-refresh, fungsi date() yang menghasilkan waktu server dijalankan oleh ...

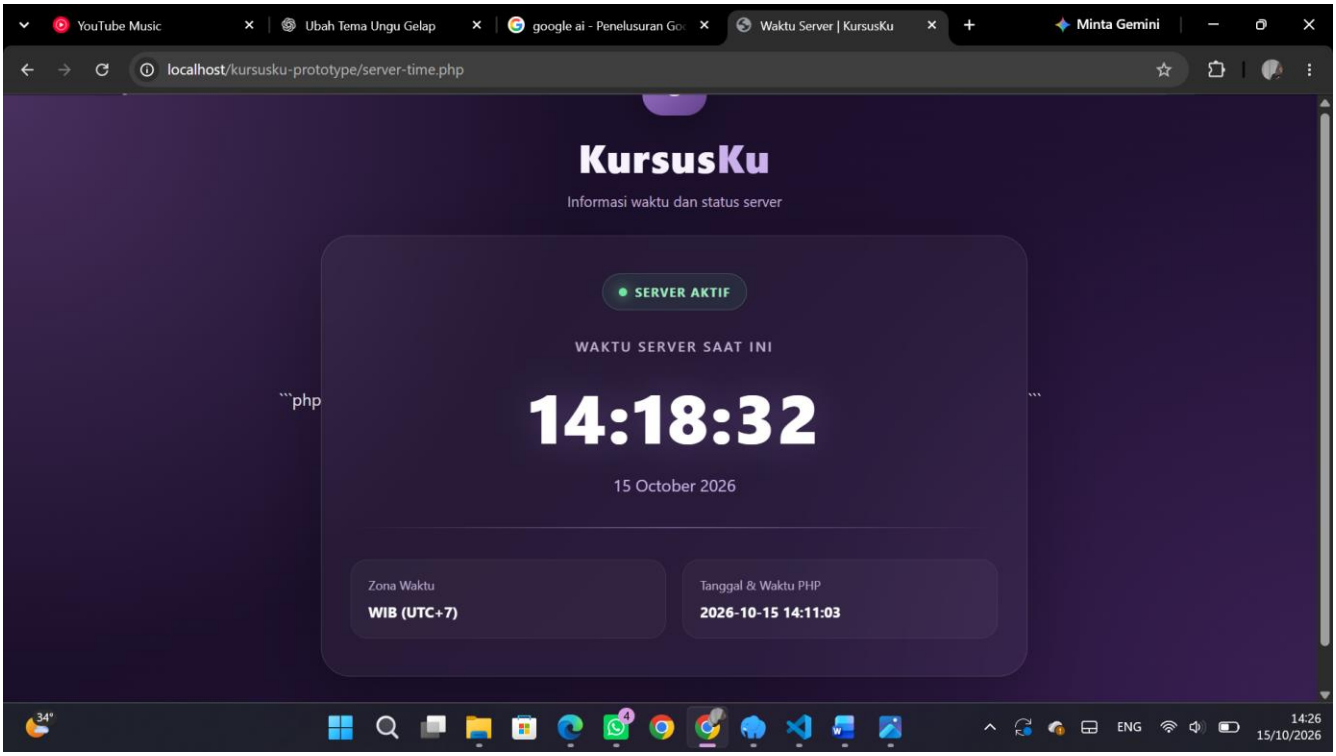

A. Browser secara langsung

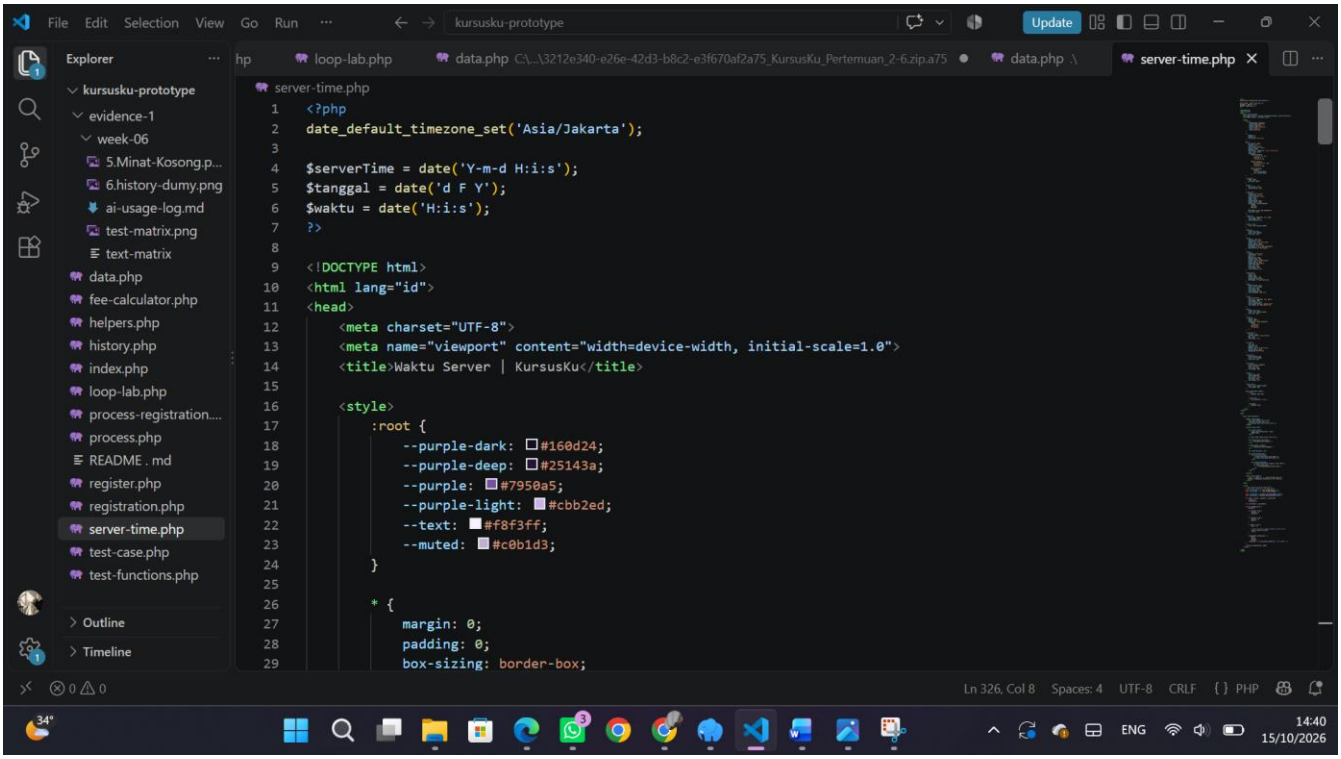

B. PHP pada web server/Laragon

C. VS Code

D. Elemen HTML <time>

Bukti wajib: *Screenshot browser server-time.php melalui URL Laragon/localhost dan, bila perlu, tab kode yang memuat date().*

2. Pada View Page Source dari index.php yang diproses dengan benar, bagian yang seharusnya TIDAK terlihat adalah ...

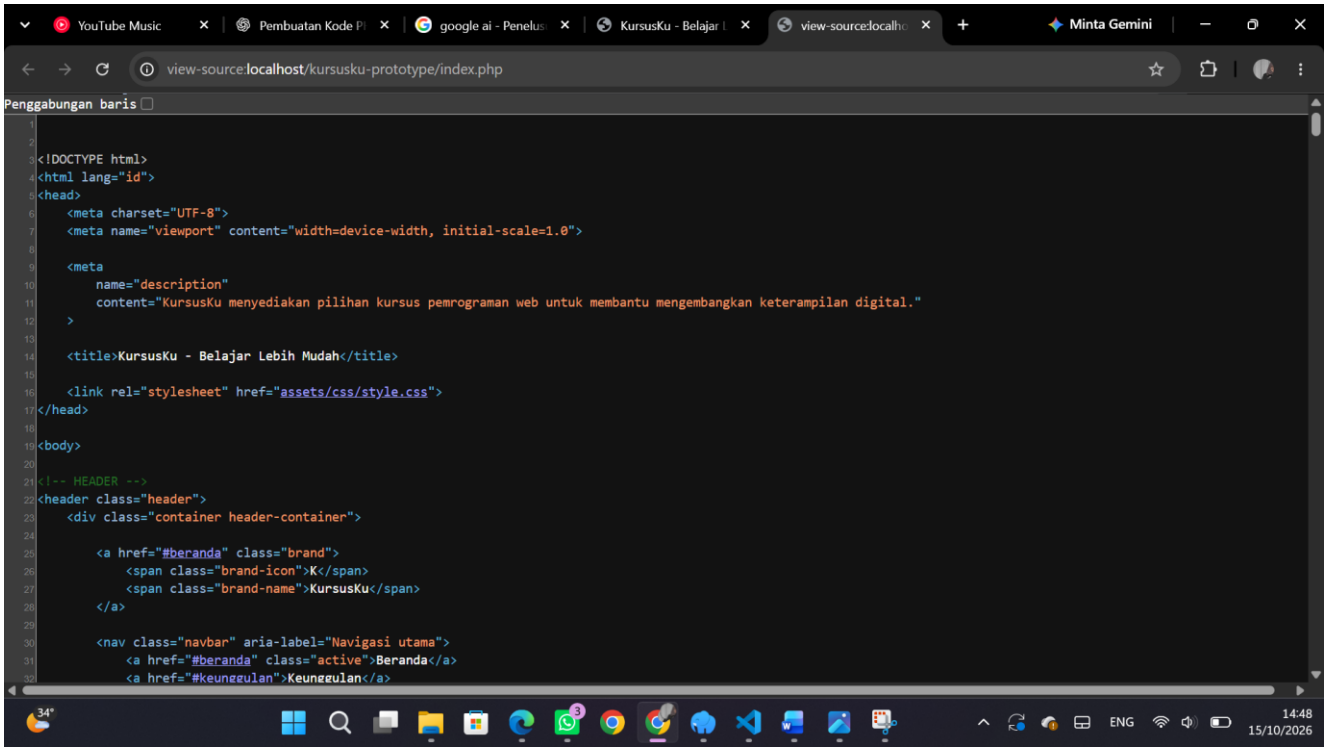

A. Elemen <h1> hasil render

B. Teks KursusKu yang sudah dirender

C. Tag <?php dan nama variabel seperti $siteName

D. Struktur <table> HTML

Bukti wajib:

3. Pada landing page, tautan href="#katalog" berfungsi untuk ...

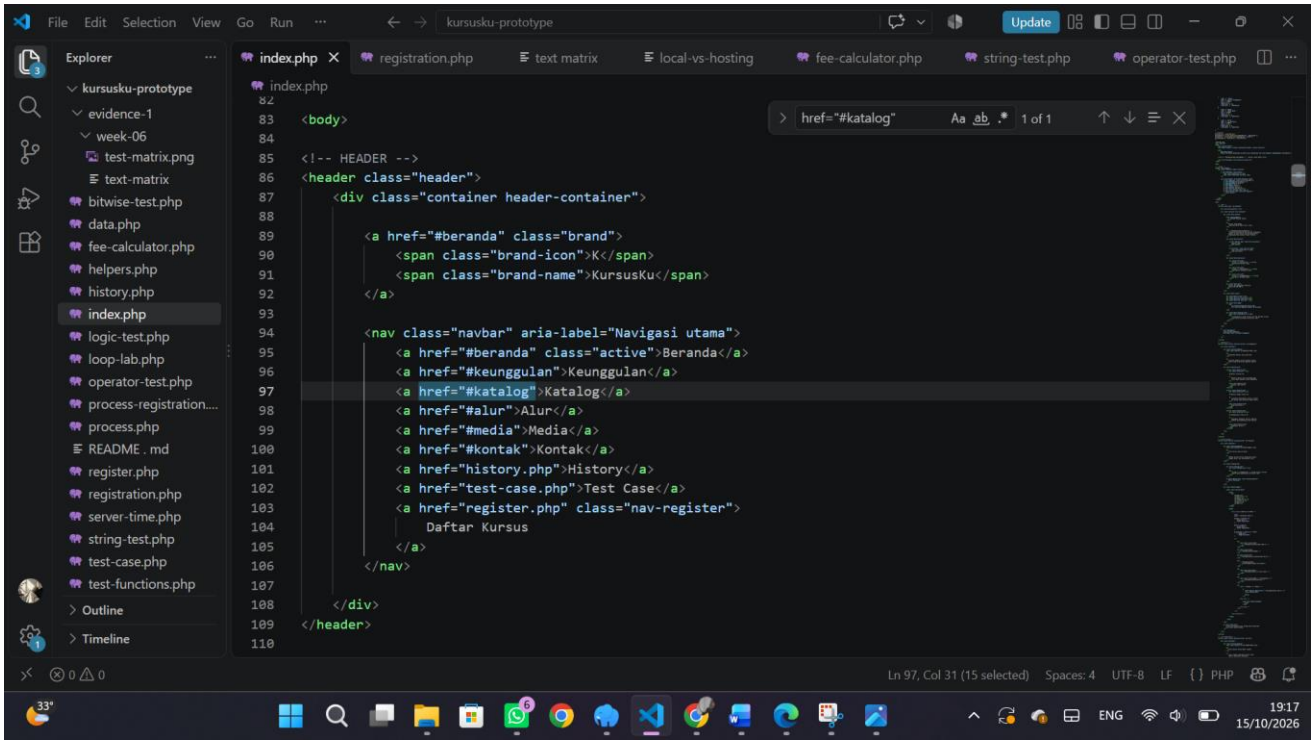

A. Membuka database katalog

B. Melompat ke elemen dengan id="katalog" pada halaman yang sama

C. Mengirim data dengan method POST

D. Menjalankan file helpers.php

Bukti wajib:

4. Path video lokal yang digunakan pada section media proyek KursusKu adalah ...

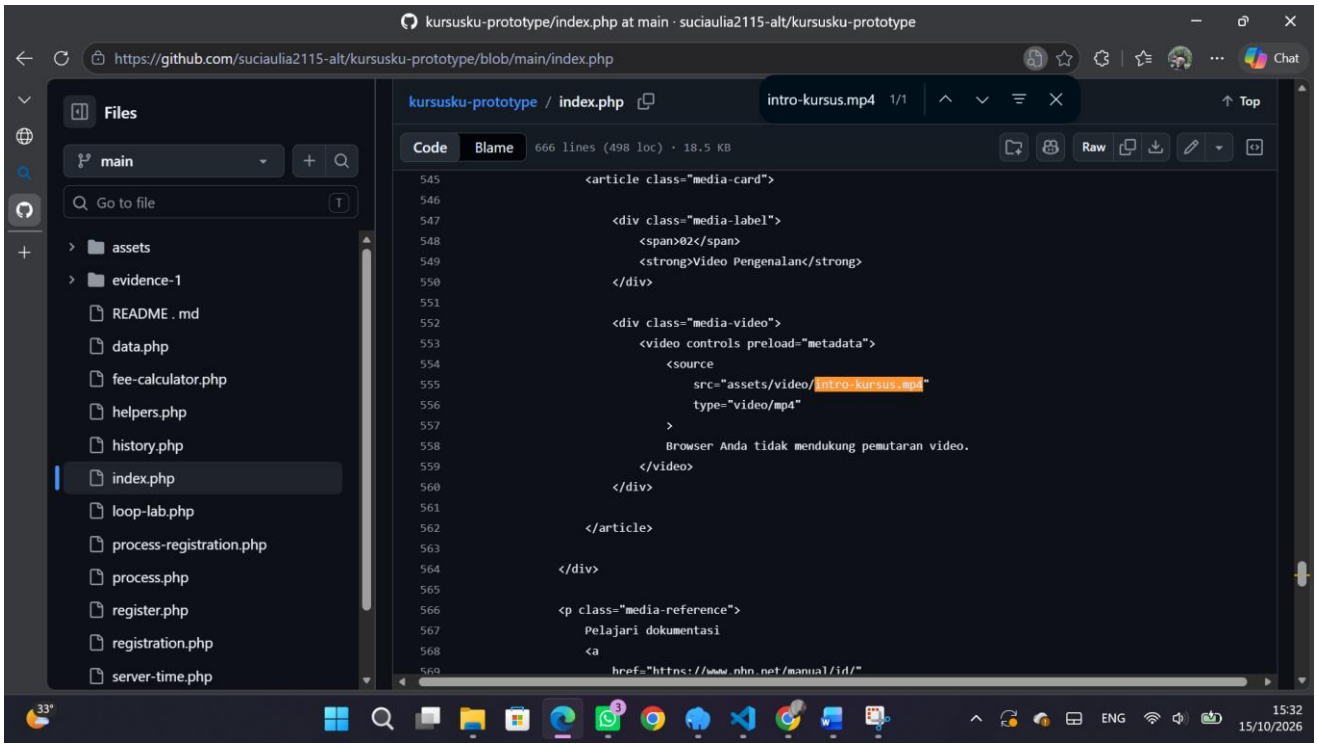

A. assets/images/intro-kursus.mp4

B. public/video/intro-kursus.mp4

C. video/intro-kursus.mp4

D. assets/video/intro-kursus.mp4

Bukti wajib:

5. Pada type-data-test.php/fee-calculator.php, variabel $isActive = true memiliki tipe data ...

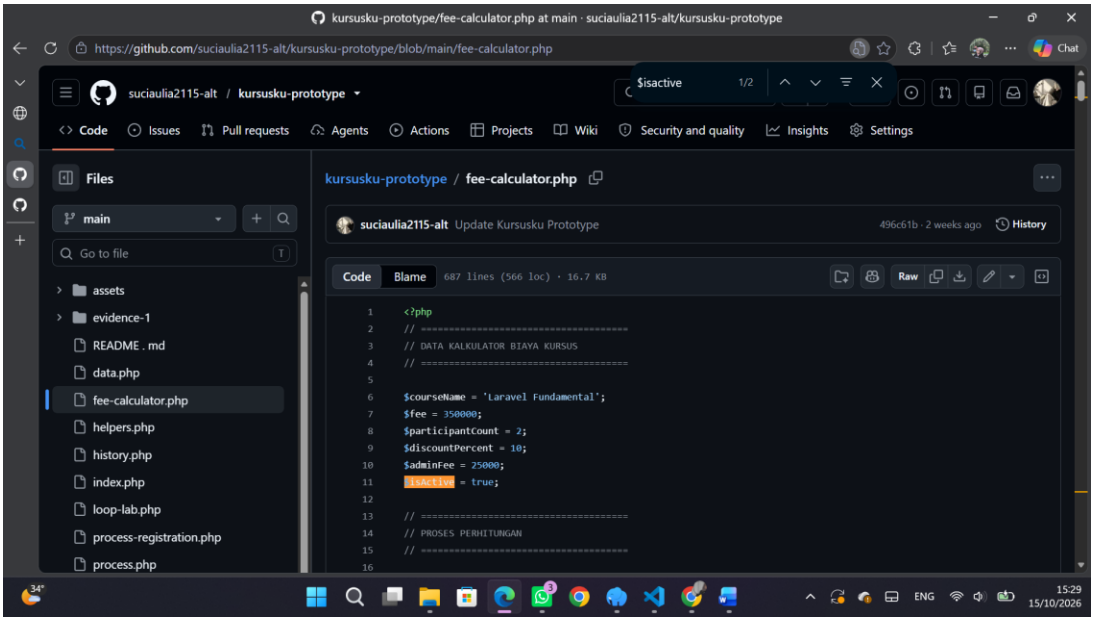

A. string

B. boolean

C. integer

D. array

Bukti wajib:

6. Operator yang benar untuk menggabungkan string dengan nilai variabel di PHP adalah ...

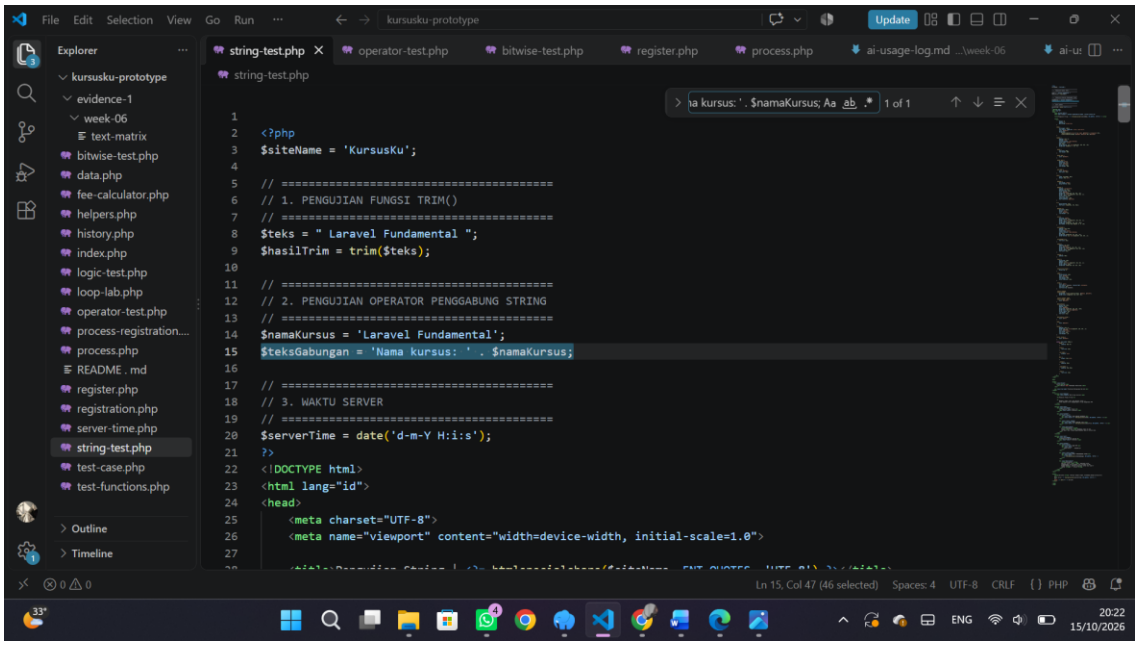

A. +

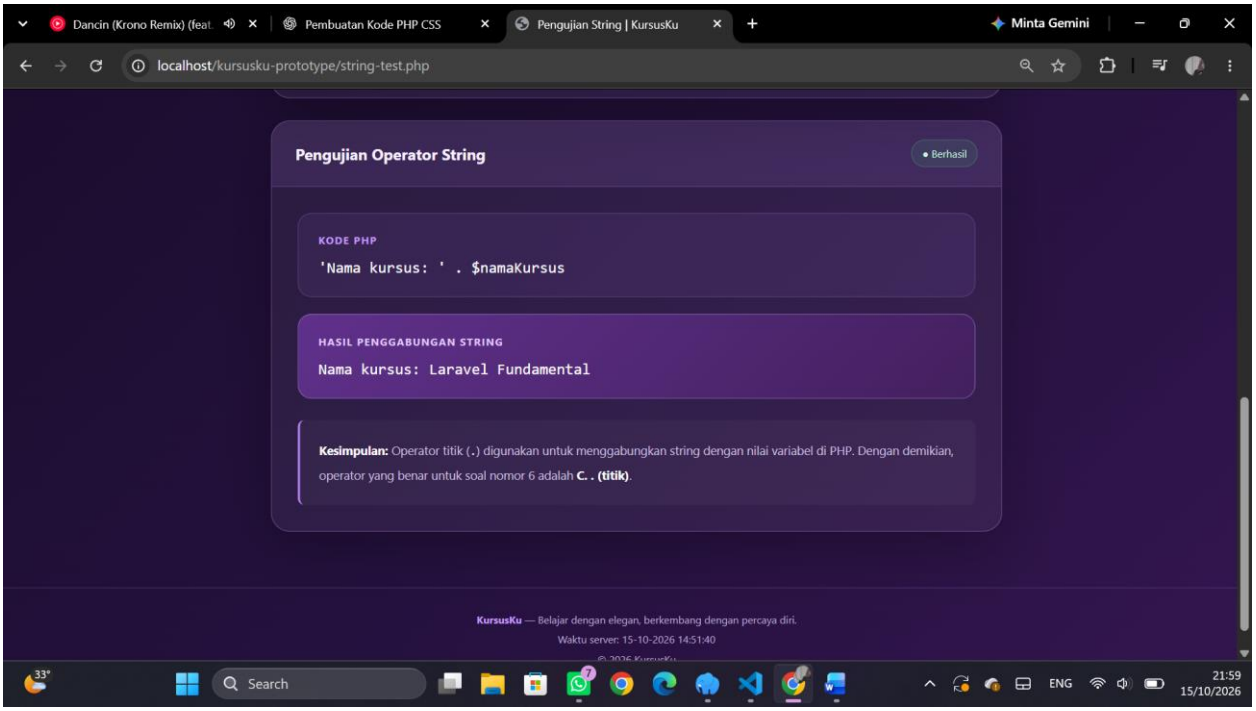

B. &&

C. . (titik)

D. ::

Bukti wajib:

7. Dengan fee Rp350.000, 2 peserta, diskon 10%, dan biaya admin Rp25.000, total akhir pada fee-calculator.php adalah ...

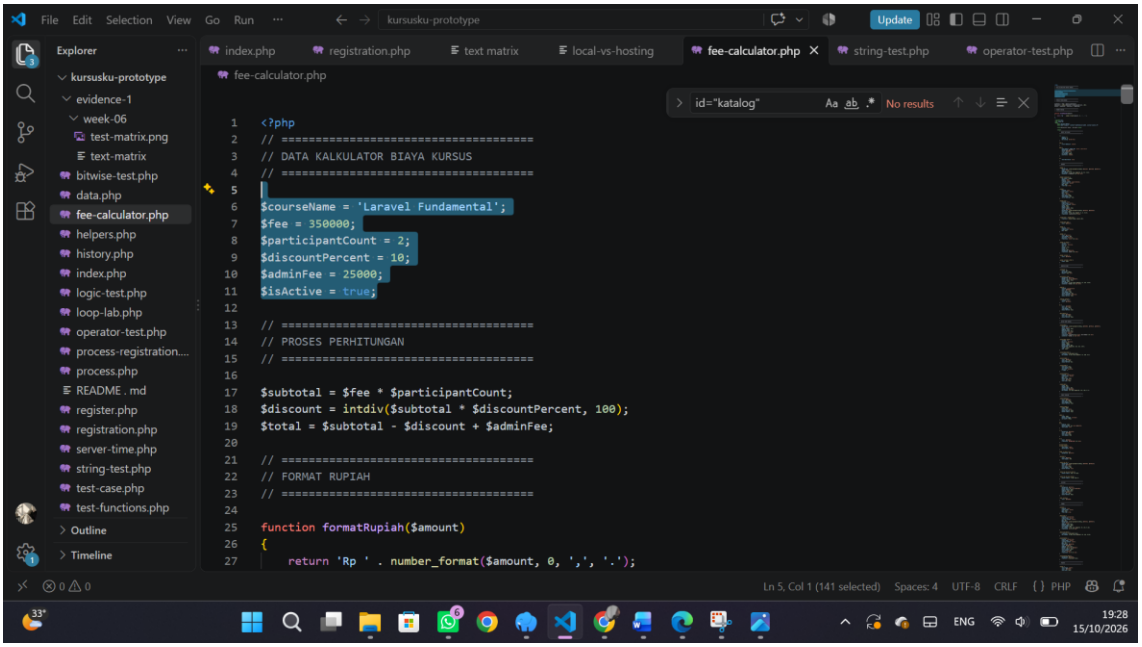

A. Rp700.000

B. Rp630.000

C. Rp655.000

D. Rp725.000

Bukti wajib:

```php
<?php
// ====================================
// DATA KALKULATOR BIAYA KURSUS
// ====================================

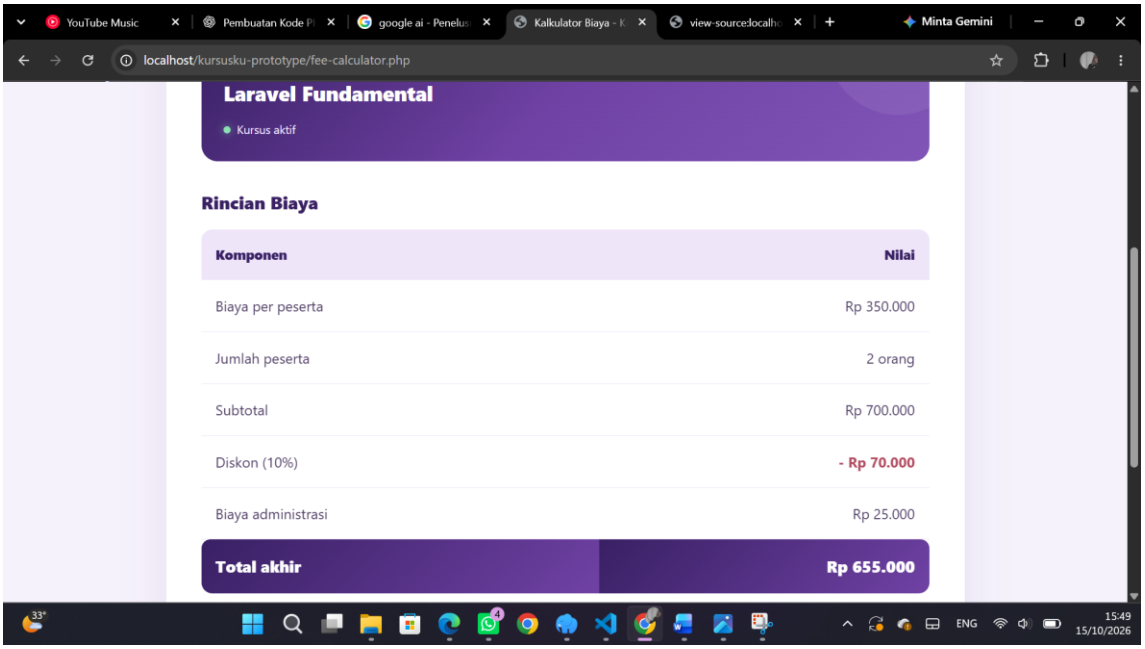

$courseName = 'Laravel Fundamental';
$fee = 350000;
$participantCount = 2;
$discountPercent = 10;
$adminFee = 25000;
$isActive = true;

// ====================================
// PROSES PERHITUNGAN
// ====================================

$subtotal = $fee * $participantCount;
$discount = intdiv($subtotal * $discountPercent, 100);
$total = $subtotal - $discount + $adminFee;

// ====================================
// FORMAT RUPIAH
// ====================================

    return 'Rp ' . number_format($amount, 0, ',', '.');
```

Laravel Fundamental

Kursus aktif

Rincian Biaya

Komponen	Nilai
Biaya per peserta	Rp 350.000
Jumlah peserta	2 orang
Subtotal	Rp 700.000
Diskon (10%)	- Rp 70.000
Biaya administrasi	Rp 25.000
Total akhir	**Rp 655.000**

8. Pada test case ke-5 di fee-tests.php (fee 2.500.000, 3 peserta, diskon 10%, admin 50.000), expected total adalah ...

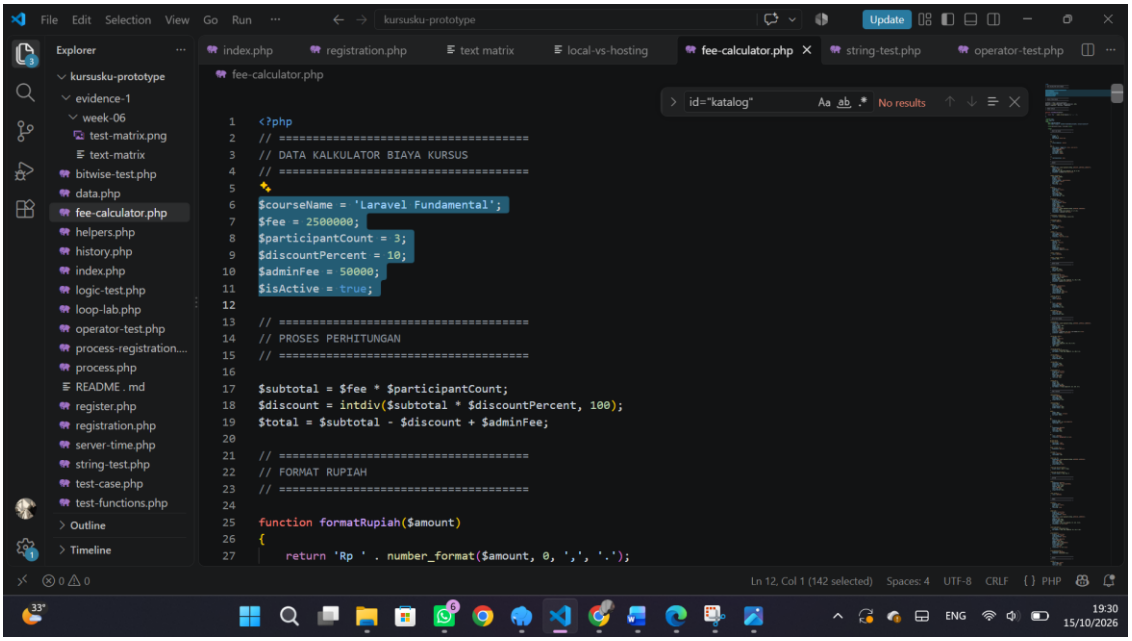

A. Rp6.250.000

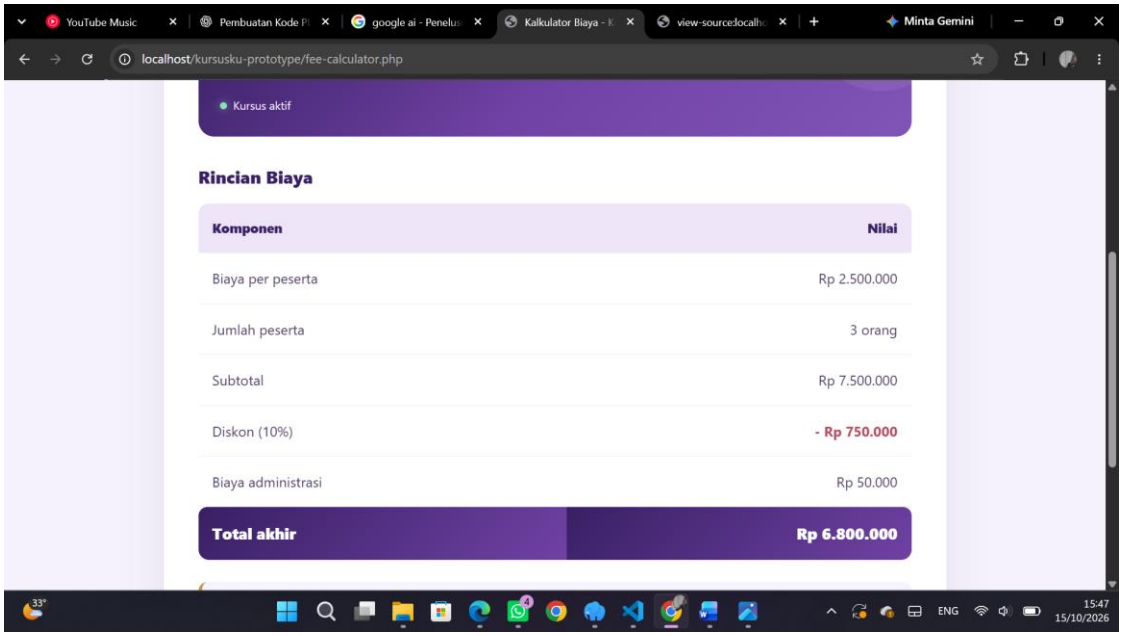

B. Rp6.500.000

C. Rp6.750.000

D. Rp6.800.000

Bukti wajib:

9. Penggunaan number_format() dalam kalkulator biaya terutama bertujuan untuk ...

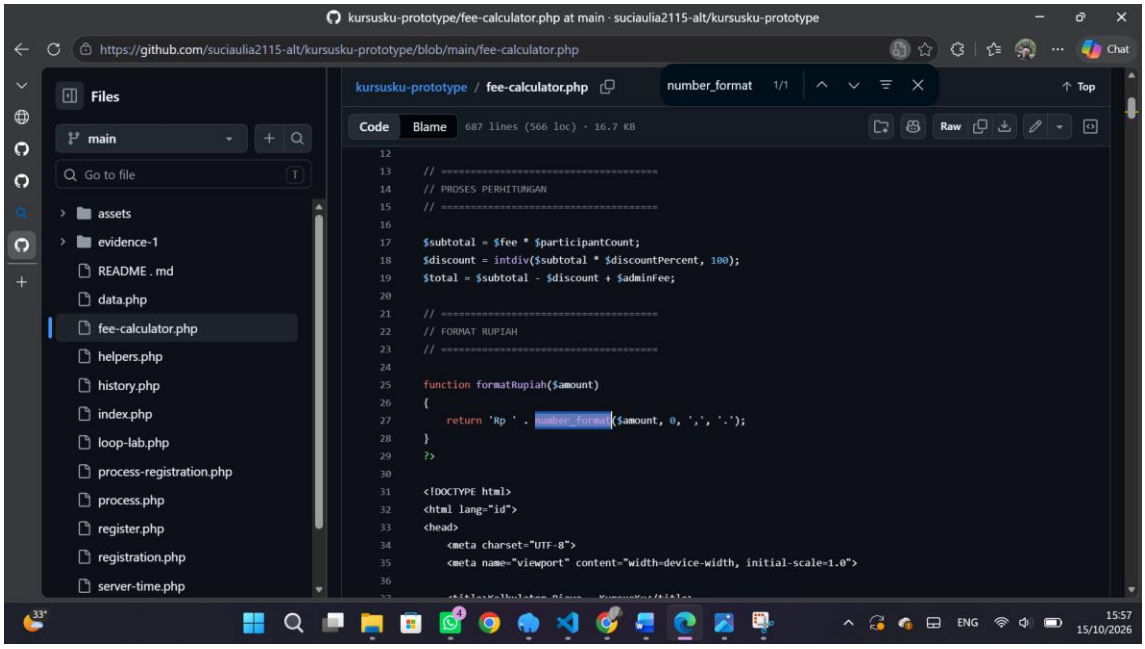

A. Memformat angka saat ditampilkan tanpa mengubah nilai integer untuk perhitungan

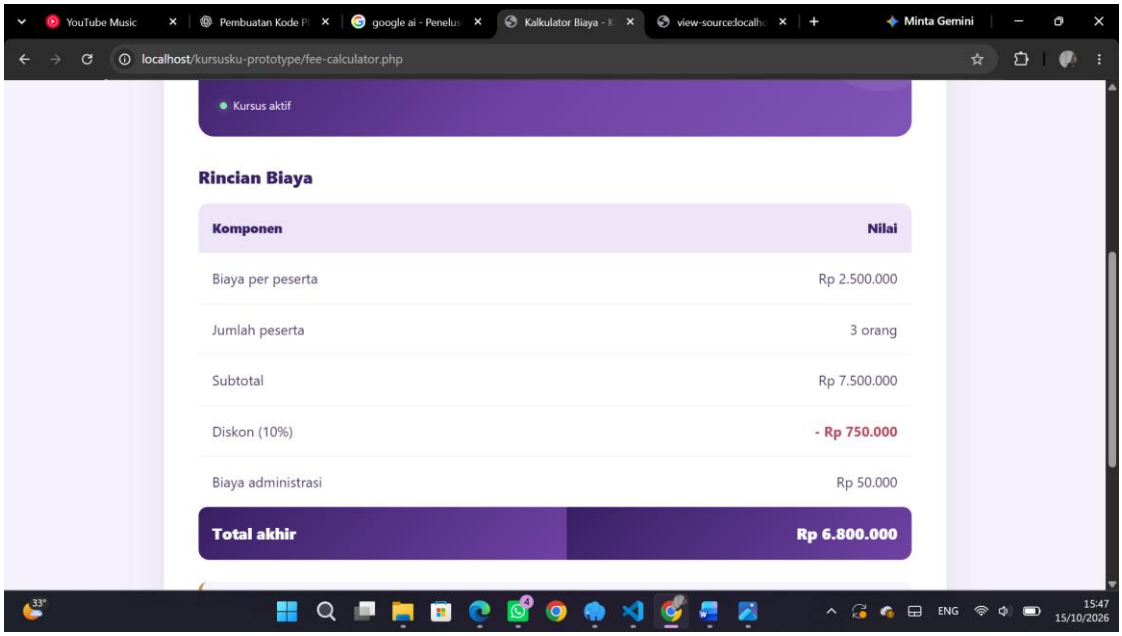

B. Mengubah integer menjadi boolean

C. Memvalidasi alamat email

D. Mencari data kursus dalam array

Bukti wajib:

10. Pada string-test.php, hasil trim() terhadap teks " Laravel Fundamental " adalah ...

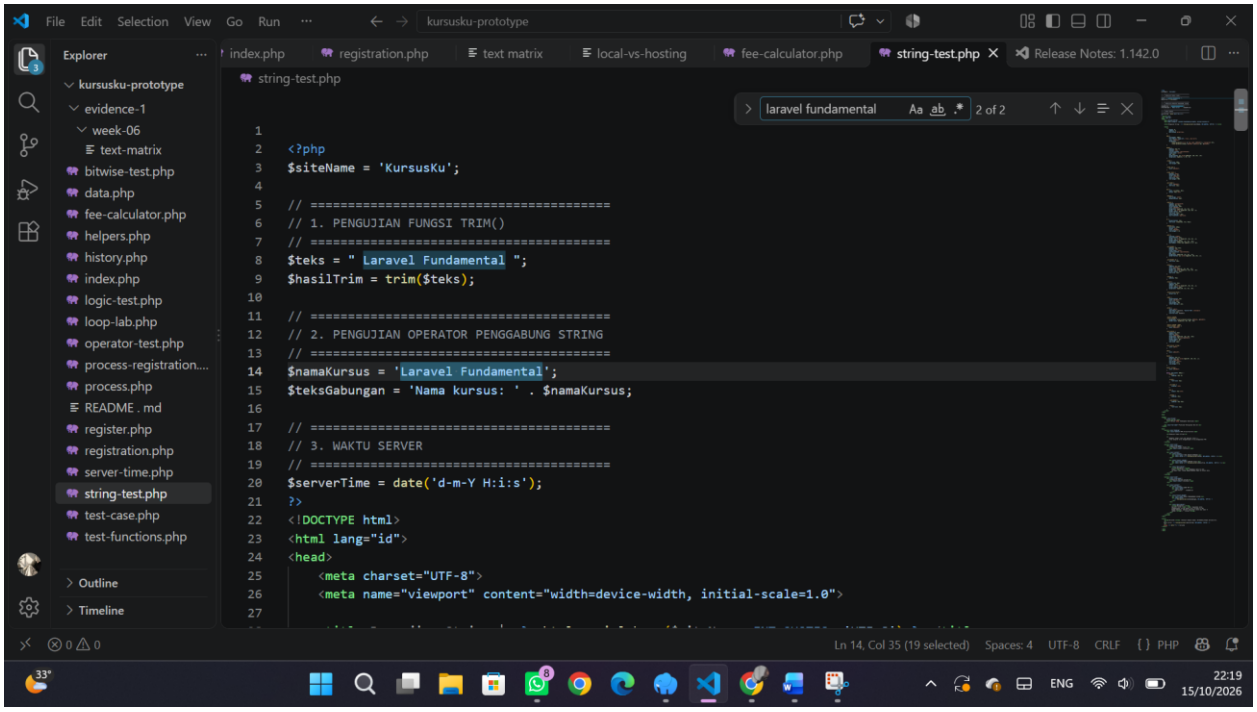

A. " LARAVEL FUNDAMENTAL "

B. "Laravel Fundamental"

C. "laravel fundamental"

D. "Laravel"

Bukti wajib:.
